A SMILE CAN LIGHT UP YOUR FACE

Only dental professionals are legally allowed to carry out tooth whitening procedures. Treatments and products offered by non-professionals (such as beauty salons/tanning salons) could potentially cause damage to your teeth.

- We use the highest percentage of professional peroxide with Novon® available for an effective whitening action.*
- White Dental Beauty Mild is a patented formula designed to whiten with less overall sensitivity.
- White Dental Beauty gels are proven to be safe, effective and produce visible results in less than a week.
- Male or female, old or young, White Dental Beauty has helped enhance thousands of natural smiles.

*Your dentist will advise the percentage of gel that is right for your smile.

WHITENING YOUR TEETH CAN HAVE A DRAMATIC EFFECT ON THE WAY YOU LOOK AND FEEL.

A healthy and confident smile is an important social asset and is regarded by many as one of the most attractive facial features.
