#BELIEVEINCLEAN

BRIGHTER AND CLEANER TEETH

AQUACARE IS THE PERFECT TOOL FOR CLEANING, LEAVE THE DENTIST WITH FRESHER BREATH AND A HEALTHIER SMILE!

- Easily remove tooth stains from everyday common causes such as coffee, tea, red wine and tobacco
- Boost your confidence & walk out with a brighter and whiter smile
- Get your teeth much much cleaner than you would with home tooth brushing
- Prevent the build-up of tartar and minimise the risk of gum disease
- Keep your mouth healthy and maintain excellent oral health

It is recommended to Include an AquaCare clean as part of your regular oral hygiene programme. Ask your dentist or hygienist for further details.

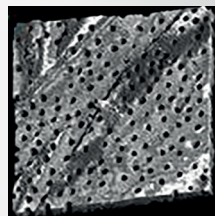

KEEP YOUR BRACES CLEANER THAN CLEAN

WHEN YOU WEAR BRACES THE PRESENCE OF BRACKETS, WIRES AND BANDS CAN MAKE IT TRICKY TO CLEAN THOROUGHLY.

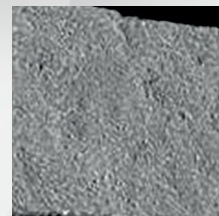

LUCKILY, AQUACARE IS THE IDEAL TOOL FOR CLEANING BRACES BECAUSE:

- It uses a gentle stream of water and powder to clean, meaning it can easily access hard to reach areas a toothbrush would struggle to reach
- It easily removes tartar, stains and plaque from your teeth and around your braces minimising the risk of decay
- It is kind to sensitive teeth, meaning you won't experience any pain while your teeth and braces are being cleaned

It is generally recommended to visit your hygienist for an AquaCare Clean regularly (every six months), or more frequently if your orthodontist recommends it.

REDUCE YOUR TOOTH SENSITIVITY

If you have sensitive teeth, then the AquaCare is for you. In one treatment your dental hygienist can gently and effectively seal the channels that are responsible for sensitivity, giving your teeth longer lasting protection.

This is achieved with a Sylec powder treatment containing containing 99% Novamin® - a technology scientifically proven to reduce sensitivity.

- Long lasting protection from hot and cold food & drinks
- Ideal for everyday day tooth sensitivity
- Perfect for managing tooth whitening sensitivity

Sylec Powder is clinically proven for the treatment of dental hypersensitivity

It is recommended to Include an AquaCare clean as part of your regular oral hygiene programme. Ask your dentist or hygienist for further details.

FREQUENTLY ASKED QUESTIONS

HOW DOES AQUACARE COMPARE TO TRADITIONAL CLEANING METHODS?

- Much more effective than a traditional scale & polish
- No vibration or heat during the treatment
- No tool touches the teeth and no pressure or force is applied
- Fast, gentle and highly effective
- Removes even the toughest of stains
- Ideal for those with sensitive teeth

HOW DOES AQUACARE WORK?

Using a special handpiece your dental hygienist will carefully and gently spray a fine jet of compressed powder, air and water against the tooth surface. As a result, you will walk away with a brighter and healthier smile.

IS AQUACARE RIGHT FOR ME?

If you suffer from stained teeth, tooth sensitivity, dental anxiety or want to maintain your oral health and cleanliness; then an AquaCare Clean is ideal for you. This pain free gentle treatment provides instant results and will greatly improve your oral health and the overall appearance of your teeth.
