NOT STERILE. REFER TO CLEANING AND DISINFECTING SECTION

**WARNING!** A calibration card is located inside the calibration cap. The calibration card is extremely fragile and sensible. You should in no way touch it with your fingers nor risk to stain it. The calibration Cap cannot be disinfected nor sterilized. In case you are unsure about its cleanliness or in case of a risk of cross contamination, please immediately discard it and take a new one.

**WARNING!** Each component has only one mounting position possible. It is recommended to train a little bit for a good understanding of mounting principles.

**WARNING!** Never try to open the Optishade base. This one is sealed and the fact of opening it cancels the warranty of the producer. **Beware** for not risking any infiltration of liquid inside the base of your Optishade.

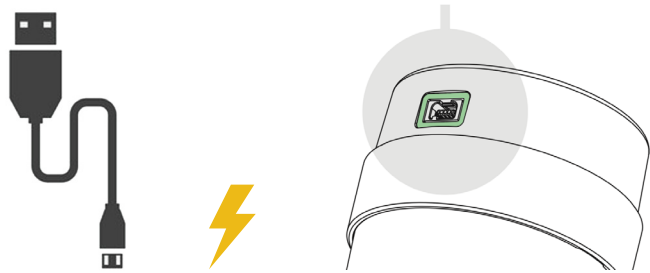

**VERY IMPORTANT!** Any damage caused by an infiltration of liquid inside the base of your Optishade is not covered by the producer's warranty.

## Quick Start Guide

Smile Line   
made in switzerland

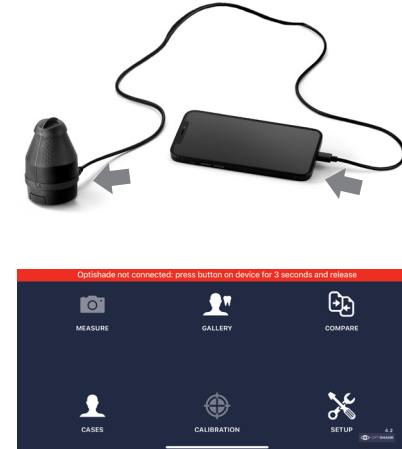

1. Fully charge the unit

2. Download free Optishade app

3. Connect Optishade to an iOS device and follow app instructions

4. Calibrate, remove the cap and start measuring
